

2 Design a page which looks like the text given below

1. Online Newspaper

Using **HTML 5 only**, create a **prototype** of an **online newspaper**:

- Throughout this exercise, **do not worry about design**. HTML is a markup language with *pre-defined presentation semantics*; the design is handled by CSS (more on this next week).
- For now, you can edit your HTML files locally.
- **Validate** and verify the result on the browser as you proceed.

Some tips and ideas:

- Use the site <http://www.lipsum.com/> if you need to generate example paragraphs.
- Use the site <https://picsum.photos/> if you need some example photos.
